EDUCATION

University of Illinois at Urbana-Champaign

Urbana, IL

Master of Computer Science

Aug 2026 - Expected May 2027

Bachelor of Science in Computer Science & Statistics, GPA: 3.91/4.00

Aug 2023 - May 2026

- **Relevant coursework:** Data Structures; System Programming; Intro to Algorithms & Models of Computation; Database Systems; Computer Architecture; Cloud Computing Applications; Deep Learning for Computer Vision
- **Relevant activities:** HackIllinois, CS124 Honors, ACM@UIUC, SIGPwny, Project Code

TECHNICAL SKILLS

Languages: Python, C/C++, SQL, JavaScript/TypeScript, Java, Kotlin, Dart

Frameworks: React, Node.js, Flask, Fastify, Flutter

Developer Tools: Git/GitHub, AWS, MySQL, PyTorch, Jupyter, VS Code, Agile

WORK EXPERIENCE

CS 124 Tutor

Champaign, IL

Siebel School Comp & Data Sci

Sep 2024 - Present

- Tutored students one-on-one to help them master core CS concepts, such as debugging, OOP, and recursion
- Trained 6 new assistant tutors on effective communication, teaching strategies, and debugging workflows

Lifeguard

Chicago, IL

Chicago Park District

Jul 2022 - Aug 2025

- Led and trained a team to maintain a safe pool environment with clear coordination and proactive safety checks

PROJECTS

Morality-based AI News Curator

Sep 2025 - Dec 2025

- Developed a Flask-based news curation app that ingests NewsAPI articles and re-ranks results using OpenAI-powered classification and scoring.
- Implemented sentiment and moral axis scoring pipelines and structured parsing/fallback handling to keep ranking reliable when API outputs vary.
- Personalized feeds by matching user moral preferences against article score vectors by minimizing distance.

Full Stack Smart Travel Planner

Sep 2025 - Dec 2025

- Built a full-stack travel planner with a React UI, Node.js/Express API, and MySQL database deployed on Google Cloud, enabling users to search and compare travel destinations.
- Designed a relational schema and ingestion pipeline for real-world flight + weather datasets (OpenFlights, OpenWeatherMap) to support fast filtering and lookups.
- Implemented preset-based search (budget/time/weather) to query destinations and return ranked results via API endpoints consumed by the React UI.

AI Wellness Chatbot

Feb 2025 - Apr 2025

- Built a Fastify backend integrating the ChatGPT API to generate real-time conversational responses from user prompts and session context.
- Processed audio input into structured prompts (transcription + context packaging) and returned responses suitable for voice + text display.
- Developed a web front-end that renders responses with synchronized subtitle-style text for readability and review.

Healthcare Records App

Oct 2024 - Dec 2024

- Implemented the Flutter registration/onboarding UI with clear integration points for a Django backend.
- Added validated identity/KYC intake flow to securely route users to the correct profile state.

Cross-Platform Recipe App

Sep 2023 - Dec 2023

- Collaborated on a 6-person team to ship a Flutter app that recommends recipes based on available ingredients.
- Built a Flutter/FlutterFlow front end and integrated external recipe APIs; designed clean recipe models (OOP) to map verbose API fields into UI-ready data.
- Delivered features in sprint cycles with regular demos and a final product showcase under fixed deadlines.
